WORKING PAPERS

1. **Greenberg, Joshua**. 2021. “Encouraging Democratic Participation via Community Meetings: Evidence from a Randomized Evaluation of Nudges in Uganda.”
 - Approach: randomized controlled trial evaluating encouragement messages aimed at motivating households to attend community accountability meetings
 - Data collection: baseline household survey in conjunction with meeting attendance record collection
 - Contribution: tests strategies to improve citizen political participation, foster collective action, and motivate public goods provision by households

RESEARCH IN PROGRESS

Governance, Citizenship, and Accountability: A Pilot Study of People-Centered Development in the Ugandan Health Sector

- Approach: randomized controlled trial evaluating citizen-politician meetings and local politician training interventions aimed at improving accountability in the healthcare system, carried out in collaboration with the Office of the Prime Minister in Uganda
- Data collection: baseline and endline household, politician, and health facility surveys, along with midline meeting surveys
- Contribution: tests strategies directly targeting political economy inefficiencies

Disparity Breeds Disparity: The Impact of Racial Inequalities in Incarceration on Educational Choice (with Hoyt Bleakley)

- Approach: adjusts and calibrates the Mincer model of schooling choice for mortality and incarceration to examine the effects of premature death and imprisonment on educational investment
- Contribution: explains majority of the gap in education between Black and White men in the U.S., providing another explanation for educational disparities and an important causal pathway in the direction from incarceration to education

SERVICE AND LEADERSHIP

PROGRAM MANAGEMENT

PROGRESSIVE HEALTH PARTNERSHIP (WWW.PROGHEALTH.ORG) *Nov 2007-present*

- Co-Founder and CEO of non-profit health and human rights organization
- Accumulated roughly four years of field experience in Uganda, spearheading the development and management of service and research programs addressing maternal and neonatal health; water, sanitation, and hygiene; and governance, civic engagement, and human rights
- Manage organizational operations such as fundraising, grant-writing, program development, legal compliance, strategy, partnerships, and personnel
- Established partnerships in Uganda with governmental, academic, and non-profit institutions spanning the local and national levels
- Raised over \$800,000 through fundraising and authoring grant proposals (see “Awards — Grants” below)

OMUKAZI NAMAGARA PROGRAM IN MATERNAL AND NEONATAL HEALTH *July 2012-present*

- Oversee the Omukazi Namagara Program (ONP), a maternal and neonatal health initiative in rural Ugandan communities
- Developed a multifaceted set of public sector-aligned interventions, including service provision enhancements at rural government health facilities and home visits to women by community health workers
- Ensured that thousands of women could access basic antenatal, postnatal, and emergency obstetric services
- Designed integrative research and service approach, with a built-in evaluation of community health workers (see “Research” above)

PEOPLE-CENTERED DEVELOPMENT IN THE UGANDAN HEALTH SECTOR *Jan 2018-present*

- Oversee the People-Centered Development Project, a health and human rights initiative that promotes grassroots, democratic governance to strengthen accountability in health service provision
- Created a unique partnership between government, academia, and local communities by establishing collaborations with the Office of the Prime Minister, Makerere University, University of Michigan, and Progressive Health Partnership
- Developed a large, innovative body of program implementation guidelines and reporting tools to help ensure standardized, efficient, and high-quality implementation of activities across different localities and facilitators, as well as replicability across organizations

RAINWATER HARVESTING IN RURAL UGANDA

June 2009-May 2012

- Conceptualized rainwater-harvesting project in partnership with local Ugandan communities
- Constructed seventy-six 20,000-liter ferrocement rainwater harvesting tanks at public buildings throughout partner communities, ensuring clean water, for the first time, at locations such as health facilities
- Designed water, sanitation, and hygiene education campaign carried out by community health workers
